Thirteen years ago Bill Kerr and his wife Weeks Ringle founded their contemporary quilt design studio. In 2005 their book, *The Modern Quilt Workshop*, became the first book to use the words "Modern Quilt" in its title. Bill and Weeks have since written many more books and magazine articles on modern quilting. They now publish *Modern Quilts Illustrated* magazine, which is distributed internationally. The art form of modern quilting has grown tremendously and become mainstream. There are now more than 200 Modern Quilt Guilds around the world. Bill will be showing some of the quilts and fabrics he and his wife design and discussing the evolution of this great American art form.
